Re: Progeny LMS, LLC & Wireless Internet Service Providers Association  
Part 15 Joint Test Report Results  
WT Docket No. 11-49

Dear Ms. Dortch:

My name is Chuck Hogg, President/Owner of Shelby Broadband. I am a Wireless Internet Service Provider (WISP) offering service to people unable to receive internet by other means from Louisville, KY to Lexington, KY. Shelby Broadband uses Cambium Networks Canopy 900 MHz equipment and serve approximately 700 customers using this technology. These customers are not able to receive internet using other frequencies because of the trees that we have here in Kentucky. Using Canopy 900 MHz is the only way I am able to serve them. The propagation of 900 MHz, in this environment, is key to serving my areas.

I am familiar with the joint test report that WISPA and Progeny has prepared and submitted to the FCC. In reviewing this document and the data within, it is clear that there is a significant risk that the above mentioned customers could lose their internet service if Progeny is allowed to broadcast in the 900 MHz band.

As an existing operator we have used nearly all of our available capital to create and expand a robust Internet service network. Our reputation in the market is based on establishing and maintaining reliable service for our customers at a good value for the money. We view 900MHz equipment and use of the 900MHz frequency as a critical element of our ability to serve what we believe to be an underserved market. If Progeny were to deploy a network operation as outlined in the joint test report we would reassess our ability to serve a meaningful portion of our current market. A significant change in our ability to serve what is currently over 20% of our existing customer base would have a highly negative impact on future investment in that component of our network.

In light of the above, we kindly request that the FCC DENY APPROVAL of Progeny's nationwide operations. Such an action would allow our company to continue to serve existing customers and invest in the expansion of our operations. We thank you for our considered review of our submission.

Sincerely,

A handwritten signature in blue ink, appearing to read "CH Hogg", is positioned above the printed name.

Chuck Hogg  
President  
Shelby Broadband
